

Lt. Gov. Wyatt to speak at lake "kick-off" meeting

'Name the lake' contest begun; entries must be in by Aug. 5

A "name the lake" contest has been announced by Charles Cox, president of the Nicholas County Development Corporation. Dan Rich, treasurer of the Corporation, has been designated chairman of the "name the lake" contest. All entries should be mailed or taken to Mr. Rich by not later than August 5, 1961. A \$25. Savings Bond will be awarded to the person who submits the name that is finally selected. Realizing that several thousand dollars will be needed to construct the swimming-beach area on the new lake, it was decided to have an entry fee for entering this contest. To be eligible to enter the contest an individual must enclose a minimum of \$1.00 for each name submitted. Any moneys received will be earmarked and reserved for the development of the swimming area, Cox said.

In suggesting names for the new 150-acre lake that will be created some time this fall, these general suggestions are given: (1) The name should be attractive as well as suited to the objectives held for the lake. (2) While this lake is located in Nicholas County, it should be considered that the lake and the facilities of the Development area will involve an area far beyond Nicholas County.

Lt. Governor Wilson Wyatt

Lt. Governor Wilson Wyatt will be the guest speaker at a "kick-off" meeting for the new Nicholas County Lake. This will be a "pot-basket" affair with everyone interested in the lake cordially invited. The meeting will be the evening of Tuesday, August 8, at 6:30 p.m. at the Nicholas County high school grounds, held rain or shine. The Nicholas County Homemaker Clubs will have charge of arranging the food.

Wyatt said, "of what can be accomplished through community-state cooperation toward making Kentucky a better place in which to live and work."

The Mercury wishes to go on record of enthusiastically endorsing all of the work done on the lake and the 4-H Camp Site development and suggest that if any of the local people who have been waiting for one reason or other to join in this project, that now is the time to further unite behind the Nicholas County Development Corporation so as to continue the utmost development of this county. There are hardly sufficient words to describe what this project may mean to all of the citizens in this area and the fact the local Corporation was organized in such a way that no individual can profit from it and any benefits now or in the future will have to be in the further development of the project is a notable achievement in itself and certainly merits the complete and whole hearted devotion and support of every citizen in Carlisle and Nicholas County.
