

Nicholas County Development Corporation (NCDC)

Prior to treating vegetation around your dock, please submit this application for approval.

You must follow state regulations when using pesticides in our lake; moreover, according to KRS217b, you cannot apply pesticides to land that you do not own without approval. The land under the lake, along with a 100-foot buffer on the bank, is owned by the NCDC.

Provided is a link to a list of pond consultants, who are approved to apply pesticides in lakes in Kentucky:
